Description:

Under the general direction of the Information Technology Manager I, the Information Technology Specialist II (ITS II) will serve as Department of Housing and Community Development's (HCD) Lead Web Application Developer. The ITS II will work with stakeholders at all levels, creates solutions to meet business needs, and leads the design, development, integration, implementation, and maintenance of Internet/intranet applications ensuring high usability, availability, performance, and accessibility utilizing modern web standards and agile development methods. The incumbent will employ initiative and resourcefulness in researching emerging technologies to develop new methods, criteria, and/or new standards, contributing to HCD's focus on improving services to customers using the power of technology and design. The duties require the ITS II to demonstrate excellent verbal and written communication skills, user-centric and intuitive web user interface design skills, web programming skills, and technical leadership skills.

Desirable Qualifications:

- Experience in developing visually appealing front end website architectures
- Working experience with responsive web design, user-centered design and usability testing
- Experience in creating storyboards, wireframes, process and navigation flows and designer mock-ups and translating them into high quality front-end code
- Hands on experience with web application development languages such as HTML, CSS, JavaScript, JQuery, PHP, React and Node.js
- Hands on experience with web content management systems such as WordPress and Drupal
- Knowledge of one or more database management systems (MySQL, MongoDB, or PostgreSQL) and web services (REST/SOAP)
- Experience with website accessibility standards and accessibility testing
- Experience working with executive-level stakeholders and achieving stakeholder buy-in for the proposed website designs

- Experience working with application development, infrastructure and security staff to implement secure and reliable websites in a leadership role
- Applied knowledge of software development life cycles such as Agile
- Ability to work well under pressure, adapt to unexpected events, prioritize and multi-task in a deadline driven environment.
